Hypermedia Services Assignment

1. **IDE used?**

   NetBeans (GlassFish or Apache Tomcat)

2. **How to import server project in NetBeans?**

   File -> Open Project -> Select project folder 'CSE564_HATEOAS_ASUAppealingServer'-> Click on 'Open Project'

3. **How to import client project in NetBeans?**

   File -> Open Project -> Select project folder 'CSE564_HATEOAS_ASUAppealingClient' -> Click on 'Open Project'

4. **How to run project?**

   Right click on project name and in projects panel and click 'Run'. As both are maven projects they need Internet connection to download dependencies.

5. **Main file in client**

   Com.asu.appealing.client.Main.java

6. **Important Note:**

   Before Client starts appeal process scenarios, we populate some graded items as if professor posting grades.

7. For HTTP mapping and state transition diagram please refer 2nd document with this project.

   'HTTP_Mapping & State_Transition_Diagram.pdf'
